

Julius Romar T. Piñon

IT Student & Software Developer

I build practical web and Android experiences across PHP and CodeIgniter systems, Kotlin and Jetpack Compose interfaces, and the thoughtful workflows that connect people to technology.

SELECTED PROJECTS

01

Air Alert

ANDROID PROTOTYPE / CAPSTONE

Designed and built a multi-screen Android experience for identifying and monitoring indoor air pollutants, including sensor details, pollutant readings, logs, alert states, and account navigation.

- KOTLIN
- JETPACK COMPOSE
- MATERIAL 3
- NAVIGATION

02

Electric Billing

WEB APPLICATION / PUBLIC SOURCE

Implemented authenticated user and admin workflows, billing computation, client records, role-protected routes, billing history, and audit logs for a database-backed application.

- PHP 8.2
- CODEIGNITER 4
- MYSQL
- JAVASCRIPT

CERTIFICATIONS & CREDENTIALS

CompTIA Tech+ Certification

COMPTIA / DEC 2025

AWS Academy Cloud Foundations

AWS / NOV 2023

Generative AI for Beginners

GREAT LEARNING / OCT 2024

Introduction to Firewall

GREAT LEARNING / SEP 2024

Google Cloud learning credentials (8): Cloud Essentials; network deployment and traffic management; infrastructure and Data/ML/AI baselines; load balancing; secure cloud networking; and foundational infrastructure and Data/ML/AI tasks.

CORE SKILLS

Web

PHP, CodeIgniter, JavaScript, React, HTML, CSS

Android

Kotlin, Jetpack Compose, Material 3

Data & cloud

MySQL, AWS foundations, Google Cloud fundamentals

Practice areas

Responsive design, UI/UX, cybersecurity awareness, system analysis

EDUCATION

Information Technology Student
Philippines

SEMINARS

Introduction to Edge Computing

USAID / ASIA OPEN RAN · AUG 2024

Cybersecurity Awareness

DICT REGION IV-A · JUN 2024

Safe Bicycle Lanes

WEBINAR PARTICIPANT · JUN 2022
